Super cute! But the outfit seems to not make much sense when holstering weapons.. One of the first and BEST (in its time of development) strategy games I ever played. You start out as a Baron among others and have to take care of your county by planting crops for food, keep happiness high, adjust your taxes, build and upgrade castles in each county you own to defend against invaders in your county, amass armies, create weaponry and fight all the other Barons and take over all the other counties until only You are left standing to be crowned King of the Land.

I love this game dearly and have been looking for it for 15 years, wishing I could play it again. Thanx to some genius and Steam I can do so again. Thank you so much.

I don't like Lords of the Realm III as much, though. Gameplay is too different (and in my opinion a step down) from Lords of the Realm II.

Lords of the Realm II will ALWAYS be one of my favourite games EVER!!!. This game has that fresh new experience that indies are made to deliver. The levels are just the right amount in length and not too easy nor too difficult to solve, especially when you correctly use the bonus items you get from trapping spiders. It has good replayability considering that the levels are randomly generated each time you start a new game, so you are always solving new mazes. It does require a system with reasonable graphics capability, so my low-spec laptop was borderline but my desktop with dedicated video card had no issues.. I kind of like the game I mean it needs some new things to change the gameplay but other than that I like it but we need contact with the devs.... While the base gameplay feels interesting, and this might be worth it if you only plan to play single player, the devs chose not to release a new server or wipe any existing servers for the full release. Most of the early access population seems to have abandoned the game as well. I visited several servers and felt like I was running around the remnants of someone's aborted Minecraft server, and did not see a single player on either. I would consider changing the review if a new server is released or if a wipe occurs.. Easy to play and fun.. A stunning little Indie Arcade game with nice Pixel graphics in Retro setting

The game itself plays as those old Arkanoid/ Brick Breaker games where we had the bar that we moved left and right to keep the ball above the screen, this one is slightly fast with tons of mechanics that this game has to offer.

The graphics are done beautifully for the game, any pixel lover will love what they've done here, the game looks good, feels good and is a pleasure to look at.

There is a funny yet ridiculous lot behind the game, a showdown between Death and the Thief Dracula, the story may not be all that deep but it plays off well with the game itself.

The game offers several things we don't usually find in these game types, enemies within the levels, boss fights, we don't always have to break every brick to progress, but instead make a exit large enough to move on, so the game offers quite a few new things that's pretty neat.

The game has a few small issues, but nothing worth game breaking, as it is this game can be thoroughly enjoyed. getting it on sale is preferred here though.

. Plays a bit better in the physics but other than that its the same old boring gameplay were i find myself getting bored after the first lap, The main concern is there is no commentary, I know racing games dont get commentary but damn this near puts u to sleep.. I really do like this Software however is there any content I can add to this version of RPG Maker? I know like the VX series you can add stuff to it, but I am not that rich atm lols so I am trying to figure out alternatives to customizing my own game type thingy :) , Like if I can get a very solid game going on maybe I can sell it on Steam and give the Creators/Company of RPG Maker a very good Royalty for every game I sell, I think not only would it support my meals and bills but it will also help the company develop more software and addons, which ultimately will be all around helping the community! I have allowed comments on here and if you have Character Sprites or Tiles for Maps that you can send my way then that will be of help! But

yes I really like this Software and I am hooked I have over 75+ hours, I believe there is even like 5 or so hours that was a glitch that Steam never picked up but either way nomatter how you round up or down I got about 80 ish hours in! I wouldn't mind finding more sprites and stuff to add to this Software and make a more interesting game! All I know is I will keep a promise! The first game I make with this software will be free to play! That is my promise to you all! Everyone after that I will work a deal with giving Royalties to RPG Maker, if they accept the Royalties! And that would be my thanks for such good software but also I wanna help all of you out! Cheers! :). I love these types of games!

In Toledo we have an actual real life escape place with different options. Loved doing it with my friends and any time I see an Escape Room VR game I have to get it.

This is probably the best one out of the group I've tried in VR!

GET IT!

Pros:

+Amazing OST. IMO it's the best OST of the year.

Cons:

+ BAD frame per second.

+ No tutorials.

+ No Asia servers.

+ Unfriendly store (many items got no instructions)

+Player pool still SO SO SO small.

But to be honest, the game have many many chances to grow it up self. Thanks for the free key, i will back to this game in a new update.. Maybe some people don't like this game,because it's boring.

Once you understand what is ZEN,you'll feel like a brain yoga.. V&G:N is a mashup of grand strategy and boardgame tactics. Challenging from start to finish, stay at the edge of your seat all the way through.

Recommended for players who are looking for something new and refreshing in a turn-based strategy game.. People were right, this is a turd. From the time I've played this game you fight generic enemies. Your shield takes forever to recharge. The big reason I stopped was because of bugs and problems with the game. First off, after one cutscene the game would not let me move, and clicking and pressing buttons did nothing, even if I pressed escape to the menu. So there I had to restart last checkpoint and it worked the next time. The final straw was when you step in the first checkpoint and it explains that they save your progress, I soon died after in a fire part that didn't make a lot of sense, and it started me all the way back at the start of the level, and I couldn't load the other checkpoint. And for such an apparently boring and uninspired sh!t game, I wasn't going to replay the same exact level for the THIRD time becaus the game has problems and can't work right even after all these years. Also you can't change graphics/difficulty/other settings in game, which is always sooo stupid. 4/10.. A 3D remake of Airline Tycoon, which was one of the most innovative business games ever made. The 3D remake adds increased loading times, more difficult versions of the nonsensical side-puzzles from the original, and a general increase in frustration. Track down the original if you can, otherwise this game offers a tantalizing glimpse of what you're missing out on.
